## **DETAILED ACTION**

### ***Response to Amendment***

The translated Foreign Priority Document filed July 17<sup>th</sup>, 2009 is sufficient to overcome the rejection of claims 1-18 based upon *Bauers et al.* and *Chowdhry et al.* as set forth in the non-final rejection mailed on May 15<sup>th</sup>, 2009.

### ***Terminal Disclaimer***

The terminal disclaimer filed on January 26<sup>th</sup>, 2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 7,417,098 and any patent issuing from application 10/521,117 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### ***Allowable Subject Matter***

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The Certified Translation of DE 10335990.7 perfects the foreign priority of the instant application and antedates the closest prior art of record to *Bauers et al.* (Macromolecules 2003 ,36 (18), pp.6711-6715).

The presently claimed instant invention is a species of the genus claimed by U.S. Patent No. 7,417,098; Patent '098 gives no indication that the 2,3,6-trichloro-1,4-para-

Art Unit: 1796

benzoquinone and 2,6-dichloro-1,4-para-benzoquinone ligated nickel phosphines lead to unexpected results with regards to higher solids content of the polymerized monomer, as seen by comparison of the Examples vs. Comparative Examples in the present specification.

The prior art of record does not teach or suggest an emulsion polymerization process wherein the combination of 2,6-dichloro-1,4-para-benzoquinone or 2,3,6-trichloro-1,4-para-benzoquinone ligands in combination with Group 7-10 transition metal phosphine catalysts are capable of polymerizing olefins in an aqueous medium. A person having ordinary skill in the art at the time of the invention would not expect the combination of elements listed above to increase the polymerization yield of olefins in aqueous media.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
